

Technical Recommendation Letter

Date: August 14, 2025

To Whom It May Concern,

I am pleased to provide this personal technical recommendation for Mr. Wiktor Jn. I have thoroughly evaluated his technical capabilities through his work on the GEEETECH A10M printer enhancement project. Throughout this process, Wiktor consistently demonstrated a rare combination of technical depth, creativity, and hands-on problem-solving skills. His expertise includes:

- **Advanced CAD Design Proficiency** –Demonstrated mastery of Fusion 360 through precision redesign of printer structural components. Delivered optimized mechanical designs that improved system rigidity by measurable margins
- **Electronics Engineering Knowledge** –Exhibited strong understanding of stepper motor systems and control electronics.
- **Microcontroller Programming Experience** –Skilled in firmware configuration and optimization for 3D printer control boards, ensuring fine-tuned machine behavior.
- **Linux Environment Familiarity** –Comfortable navigating Linux environments for firmware compilation, system configuration, and experimental testing.

I am confident that Wiktor would make a valuable addition to any engineering or product development team. His technical expertise, inventive thinking, and dedication to continuous improvement set him apart as both a capable engineer and a collaborative problem solver.

Please feel free to contact me via email (Teddy.hu@geeetech.com.cn) if you have any questions.

Sincerely,

R&D Department, GEEETECH

WIKTOR JELEŃ

📞 (+48) 576 706 766 ✉ root@yelon.pro 🌐 yelon.pro

Location: Kraków, Poland | Status: Root Access System Architect

PARADIGM & STRATEGY

I operate within the **High-Velocity Engineering** paradigm. I leverage LLMs as high-order compilers, allowing for a rapid transition from business logic to stable production code. My measurable impact – including a proprietary Quant library operating on real capital (**36,000+ PyPI downloads**) and hardware optimization experience in Shenzhen – serves as hard evidence of my methodology in delivering high-stakes results.

Note to Recruitment: My high-velocity methodology is engineered for environments where "Automation-First" and "Security by Design" are systemic requirements. I exclusively target technical partnerships where technical debt and manual workflows are treated as **systemic vulnerabilities**. This alignment ensures maximum ROI on my integration, allowing for rapid, stable scaling without the latency of micromanagement.

EDUCATION

B.Eng. in Computer Science, Cybersecurity (Part-time, Weekends) 10.2024 – Present
WSB National Louis University Kraków, Poland

Mechatronics Technician
Technical School of Electrical Engineering and Mechanics Nowy Sącz, Poland

PROFESSIONAL EXPERIENCE & R&D

System Architect (Anatomy Project) 09.2025 – 02.2026
Randlab Software Remote

- **Backend Core:** Designed and deployed a scalable architecture using **NestJS 11**, **TypeORM**, and **MySQL 8** for 450+ concurrent users (Medical University of Silesia).
- **Cybersec & Auth:** Implemented **LDAP (ldapts)** integration with University Active Directory and **JWT**-based authorization. Conducted **OWASP Top 10** audits, enforced strict input validation (**Zod**), and data sanitization.
- **Infrastructure/DevOps:** Configured production environments (Ubuntu, **Nginx reverse proxy**, **SSL**, **PM2**) and engineered **CI/CD** pipelines via GitHub Actions for automated deployment.
- **API & Data:** Designed a comprehensive **RESTful API** (Swagger/OpenAPI, 16+ endpoint types) featuring advanced pagination, filtering, and sorting (**nestjs-paginate**).
- **QA/QC:** Authored unit and integration tests (**Jest**) maintaining **50%+** code coverage.

R&D Systems Engineer (Hardware Enhancement) 08.2024 – 08.2025
GEEETECH (R&D Department) Shenzhen, China / Remote

- **Full-Remote Autonomy:** Managed system integration and firmware optimization (Klipper) for the Shenzhen tech hub; served as a strategic technical bridge between European engineering standards and Chinese R&D velocity.
- Advanced structural redesign of A10M printer components in Fusion 360 and stepper motor control optimization.

Consultant: Sales Systems Configuration 04.2023 – 07.2024
Randlab Software (Polsat Plus Group) Remote

- Automated client documentation generation and configured complex sales offers for POS, telemarketing, and mobile sales channels.

Embedded / Thingsboard Specialist 09.2022 – 03.2023
Randlab Software Nowy Sącz, Poland

- Developed a pipe impedance monitoring system for the heating industry using **ThingsBoard**.
- Integrated hardware (C++) with web interfaces and implemented AWS-based alerting systems.

PROJECTS / OPEN SOURCE

- PythonMetaTrader5 | Production-Ready Quant Library** 🔗 Link
- MetaTrader5 wrapper (**36,000+ downloads** on PyPI). Designed for algorithmic trading with real capital, ensuring data normalization and critical execution stability (retcode handling).

- **FastAPI** backend integrated with TradingView webhooks. Fully containerized via Docker with automated CI/CD.

TECHNICAL SPECIFICATIONS

Python:	FastAPI, Algorithmic Trading Logic, Pytest, Data Science Stack
Quant:	MetaTrader5 API, Risk Management Systems, Financial Data Normalization
Backend:	NestJS 11, TypeScript, Node.js, TypeORM, MySQL, PostgreSQL, Redis
Infrastructure:	Linux (Ubuntu/Debian), Nginx, PM2, Docker, GitHub Actions (CI/CD), AWS
Cybersec Logic:	IAM (LDAP/AD), JWT, Zod Validation, OWASP Top 10 Audit, SSL/TLS
Low - Level:	C++ (Embedded), SPI/I2C, Klipper Firmware, Hardware Optimization
Tools:	Jest (Testing), Swagger/OpenAPI, Postman, Claude Prompt Engineering

I hereby give consent for my personal data to be processed by the potential employer for the purpose of the current and future recruitment processes, in accordance with the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

LIST REKOMENDACYJNY

• Wiktor Jeleń

Firma CTS TECHNOLOGY z siedzibą przy ul. Limanowskiej 29, 33-395 Chełmiec, niniejszym potwierdza, że Pan Wiktor Jeleń współpracował z nami przy projektach związanych z utrzymaniem oraz rozwojem infrastruktury informatycznej i narzędzi wspierających działalność firmy.

W trakcie współpracy Pan Wiktor wykazał się bardzo dobrą znajomością systemów operacyjnych z rodziny Linux, w szczególności w zakresie:

- administracji systemami serwerowymi,
- konfiguracji środowisk programistycznych,
- automatyzacji zadań systemowych,
- zarządzania usługami sieciowymi.

Istotnym elementem jego pracy było również programowanie w języku Python, które wykorzystywał m.in. do:

- tworzenia skryptów automatyzujących procesy techniczne,
- przetwarzania danych oraz integracji systemów,
- budowy narzędzi wspierających pracę zespołu technicznego,
- prototypowania rozwiązań wykorzystywanych w projektach technologicznych.

Pan Wiktor posiada również wiedzę z zakresu cyberbezpieczeństwa, którą wykorzystywał przy zabezpieczaniu systemów informatycznych, monitorowaniu potencjalnych zagrożeń oraz wdrażaniu dobrych praktyk związanych z ochroną infrastruktury IT. W szczególności zwracał uwagę na bezpieczeństwo systemów Linux, konfigurację mechanizmów zabezpieczeń oraz minimalizowanie ryzyka nieautoryzowanego dostępu do systemów.

Pan Wiktor Jeleń jest osobą rzetelną, samodzielną oraz bardzo dobrze zorganizowaną. Wyróżnia się analitycznym podejściem do problemów technicznych oraz umiejętnością szybkiego znajdowania skutecznych rozwiązań.

Z pełnym przekonaniem rekomendujemy Pana Wiktora Jelenia jako specjalistę w obszarze systemów Linux, programowania w Pythonie oraz cyberbezpieczeństwa. Jesteśmy przekonani, że jego wiedza i zaangażowanie będą cennym wkładem w działalność każdej organizacji technologicznej.

SEBASTIAN ŁATKA R&D DIRECTOR

Prezes

As the Marketing Director of Wyższa Szkoła Biznesu – National Louis University in Nowy Sącz, I provide this technical recommendation for Mr. Wiktor Jeleń with full confidence. My opinion is based on his key contribution to the technological execution of the "Researchers' Night 2024" event.

In this edition, Wiktor served as the Lead Software Engineer in the web technology and automation section. His work provided tangible evidence of proficiency in building modern, scalable solutions and professional code lifecycle management. Key areas of his competence include:

- **FastAPI Framework Development (Python):** Wiktor designed and implemented high-performance, asynchronous APIs. He demonstrated an excellent understanding of REST architecture, data validation (Pydantic), and automatic documentation (Swagger), confirming his high engineering standards.
- **Containerization and Orchestration (Docker):** He showcased proficiency in runtime environment isolation. He independently prepared container images (Dockerfiles), proving his skills in the DevOps domain and in ensuring environment consistency between development and production stages.
- **Professional Code Management (Git & GitHub):** Wiktor demonstrated proficiency in version control systems. He utilized the GitHub platform to publish and document his projects, applying industry best practices (commits, README, branch management). His approach to transparency and repository organization is evidence of professional maturity.
- **Knowledge Transfer and Communication:** A remarkable achievement of Wiktor's was his ability to explain complex concepts, such as "containerization" or "cloud-based code sharing," to non-technical individuals and children. He conducted workshops that visually demonstrated the fundamentals of modern programming.

Given the above, I recommend Mr. Wiktor Jeleń as a highly qualified specialist. His technical proactivity and ability to implement modern code standards make him a candidate ready to execute complex projects.

Should you have any questions regarding the technical aspects of the projects completed by Mr. Wiktor, I remain at your disposal at: marketing@wsb-nlu.edu.pl.

As the Marketing Director of Wyższa Szkoła Biznesu – National Louis University in Nowy Sącz, I am pleased to issue this technological recommendation for Mr. Wiktor Jeleń, based on his key contribution to the execution of the "Researchers' Night 2023" event.

During this edition, Wiktor served as an expert in the field of software engineering. I had the opportunity to directly observe his work, which demonstrated advanced skills in the following areas:

- **Python Programming:** Wiktor demonstrated proficiency in creating clean and efficient code, utilizing standard libraries and data structures to solve specific logical problems.
- **Process Automation and Scripting:** He showcased the ability to use Python as a tool for task automation, confirming his practical approach to system workflow optimization.
- **Technical Didactics and "Live Coding":** Wiktor's unique competence was his ability to conduct live programming demonstrations for individuals without any prior technical background. He was able to explain Python syntax and logic to the youngest participants (children) in an exceptionally accessible manner, demystifying the software development process.
- **Analytical Problem-Solving:** During interactions with participants, Wiktor exhibited creativity in translating complex algorithms into simple mental models, providing evidence of a profound understanding of the fundamentals of computer science.

I am convinced that Wiktor Jeleń will be an extremely valuable asset to any software development or implementation team. His technical versatility, combined with a rare ability to communicate difficult concepts in a simple way, distinguishes him as a mature IT specialist.

Should you have any questions regarding the technical execution of projects by Mr. Wiktor, please contact me via email at: marketing@wsb-nlu.edu.pl.

As the Marketing Director of Wyższa Szkoła Biznesu – National Louis University in Nowy Sącz, I provide this recommendation for Mr. Wiktor Jeleń with full confidence, based on his strategic contribution to the execution of the "Researchers' Night 2022" event.

In this edition, Wiktor served as the Lead Engineer in the Network Infrastructure and Cybersecurity zone. His work provided hard evidence of proficiency in system architecture management, the implementation of rigorous security protocols, and data monitoring.

Key areas of his competence included:

- **Network Architecture and Cybersecurity:** Wiktor designed and deployed secure, fully isolated network environments for "Live" demonstrations. He showcased flawless implementation of "Security by Design" principles and access control mechanisms, effectively securing the demonstration infrastructure against unauthorized external interference.
- **Telemetry and System Integration (IoT/Cloud):** He successfully demonstrated the process of securely collecting and transmitting data from embedded systems to analytical dashboards. He proved his skills in optimizing information flow and configuring alerting systems in a distributed environment.
- **Social Engineering and Security Awareness:** Wiktor's unique added value was his ability to deconstruct complex digital attack vectors into language understandable to the general public. By conducting interactive demonstrations of controlled security breaches, he educated youth and adults in a highly accessible manner on fundamental digital hygiene and defense against social engineering.

Given the above, I recommend Mr. Wiktor Jeleń as a highly qualified specialist. His cold analytics, proactive approach to vulnerability identification, and ability to communicate complex architectural concepts make him an engineer ready to execute the most critical technological projects.

Should you have any questions regarding the technical aspects of the projects completed by Mr. Wiktor, I remain at your disposal at: marketing@wsb-nlu.edu.pl.

As the Marketing Director of Wyższa Szkoła Biznesu – National Louis University in Nowy Sącz, I recommend Mr. Wiktor Jeleń with full confidence, based on his outstanding contribution to the technological framework of the "Researchers' Night 2021" event.

During this edition, Wiktor served as the lead for the modern technology section, where he was responsible for designing and presenting advanced electronic circuits and automated systems. His work serves as direct evidence of proficiency in the following areas:

- **Microprocessor Systems and IoT:** Wiktor demonstrated advanced knowledge of the Arduino platform, designing and programming control systems based on sensors and executive components.
- **Raspberry Pi Implementations:** He presented the practical application of single-board computers in a Linux environment, demonstrating proficiency in system configuration and General-Purpose Input/Output (GPIO) interface management.
- **3D Printing Technology:** He showcased skills in component design and the optimization of printing parameters to achieve high mechanical precision of the elements.
- **Engineering Problem Solving:** Wiktor successfully managed technical challenges arising during live demonstrations, confirming his creativity and ability to perform under time pressure.
- **Technical Communication:** Wiktor's greatest asset was his ability to clearly explain complex electronic and mechanical concepts to audiences without a technical background, including children, which testifies to a profound understanding of the subject matter.

Mr. Wiktor Jeleń's engagement in 2020 proved that he is a specialist with broad technical horizons, combining theoretical knowledge with practical implementation. I am convinced that he will be a valuable asset to any engineering or project team.

Should you require further information, I remain at your disposal at: marketing@wsb-nlu.edu.pl.

As the Marketing Director of Wyższa Szkoła Biznesu – National Louis University in Nowy Sącz, I had the pleasure of collaborating with Mr. Wiktor Jeleń during the "Researchers' Night 2020" event. This letter serves as official confirmation of his technical proficiency and exceptional interpersonal skills within the IT technology sector.

During the event, Wiktor served as an expert and speaker in the operating systems zone. His work was a key technological component of the event, and his most significant achievements included:

- **Practical demonstration of the Linux ecosystem (Server & Desktop):** Wiktor successfully configured and demonstrated the operation of Linux systems, showcasing proficiency in both graphical user interface management and advanced command-line interface (CLI) operations.
- **Technology adaptation for non-technical users:** Wiktor's greatest asset proved to be his ability to translate hermetic IT language into concepts understandable to laypeople. He conducted interactive demonstrations dedicated to children and youth, explaining the principles of open-source software and system structures in an accessible and engaging manner.
- **Implementation of solutions in a "Live" environment:** Wiktor was responsible for the stability of the presented server solutions throughout the multi-hour event. He demonstrated the ability to rapidly resolve technical issues under time pressure (Troubleshooting).
- **Promotion of Open-Source solutions:** Leveraging his substantive knowledge, Wiktor effectively debunked myths regarding the difficulty of using Linux, presenting it as a secure and efficient alternative to commercial systems.

Mr. Wiktor Jeleń's performance during the Researchers' Night 2019 proved that he possesses not only hard engineering knowledge but also a rare skill for technical communication. These traits make him an ideal candidate for positions requiring both technical competence and the ability to work with clients or teams.

I remain at your disposal to confirm the above information at: marketing@wsb-nlu.edu.pl.
